About us

We, "**Septech Fire Protection Pvt. Ltd.**" are known as Leaders in Fire & Safety.

We offers Fire Protection systems as per IS Standards / NBC / NFPA with design / Supply / Installation / Testing & Commissioning.

Septech Fire Protection has the technical capability and resources to install and service every type of Fire Protection and Fire Detection system for Industrial, Commercial and High Rise Residential requirement. We have a team of recognized engineers with decades of experience and Fire as well as Safety Officials associated with us. A varied range of tools, techniques, & devices are used as an overall protection strategy. Our in-house team consists of Engineers, Project Managers, Site Supervisors, well equipped and facilitated infrastructure for back- office co-ordination.

The directors of the company- **Mr. Bhaumik Padariya** and **Mr. Chirag Shelat** takes pride in their work and strongly believe that their commitment to quality has made them stand out from the crowd. We strive to ensure the rapid installation of our systems in the buildings so that the minimum interruption is caused to businesses.

Turnkey Services

Services

1. Design & Engineering

Septech Fire offers a diverse background in the field of fire protection engineering. We offer in-house fire protection engineering consulting. Our team has a wealth of experience in the design and upgrade of fire protection systems meeting all current building codes, Local fire authority and other standards. Septech Fire has successfully designed Fire Hydrant, Sprinkler, Spray & Fire alarm & Detection systems meeting all of the requirements of NBC, IS, and Gujarat Fire Prevention and Life Safety Measures act.

2. FIRE HYDRANT SYSTEMS

The best fire hydrant systems are very effective and can be used in times of fire of medium or large flames so that fire accidents can be prevented from different angles. Our company has been capable to mark its strong presence in the market as one of the well equipped manufacturers and service providers of the wide collection of Hydrant systems.

These techniques are highly utilized in the occurrence of fire. The main purpose of our best reasonable fire hydrant system is to give the best possible source of water to each corner and floor of the building. It helps you in protecting the building by taking control of fire during an emergency.

3. FIRE SPRINKLERS SYSTEM

Fire sprinkler system is yet a simple but vital component of a domestic or commercial building's Fire protection system. Fire sprinklers are very beneficial in saving lives and property during fire accidents.

Fire sprinkler is the component of a fire sprinkler system that discharges water when the effects of a fire have been detected, such as when a predetermined temperature has been exceeded

Sprinkler system is a fire-fighting device that is installed in buildings as a preventive measure.

4. FIRE ALARM & DETECTION SYSTEM

Fire Alarm and Detection Systems are life safety systems designed for detecting fire at an early stage and alarm the occupants. These systems play a vital role in protecting the safety of emergency response personnel

Fire detection and alarm systems are highly beneficial in reducing the property loss and downtime for the operations. With over years of experience in the field, Septech Fire Protection Private Limited offers smart solutions designed to protect your lives quickly and effectively.

5. SPRAY SYSTEM

Spray System are widely used for fire protection of flammable liquid and piping, pumping equipment, electrical equipment, etc. This system has a special fixed pipe system which is connected to a source of pressurized water supply. Spray systems usually can be operated automatically or manually, or both.

Septech Fire protection Pvt. Ltd, we specialize in supplying and installing high-medium velocity water spray systems to provide our clients superior protection from the fire. All our systems are thoroughly inspected and are highly appreciated for durability, optimum performance, and long service life.

6. FIRE EXTINGUISHERS

Fire extinguisher, portable or movable device used to put out a small fire by directing onto it a sense that cools the burning material, deprives the flame of oxygen or interferes with the chemical reactions happening in the flame.

A to Z fire safety solutions such as installation, inspection, repair, and replacement of fire extinguishers are available at Septech fire Protection Pvt. Ltd.

7. FIRE FIGHTING TRAINING

Fire safety training can teach workers how to recognize fire hazards, conduct a fire safety risk assessment, prevent a workplace fire, and respond if a fire occurs. The fire safety risk assessment helps identify what a workplace needs to do to prevent a fire and keep people safe.
